

WHAT IS IT?

GA@WORK will replace the current TeamWorks / PeopleSoft Human Capital Management (HCM) and Finance systems with a modern, cloud-based Enterprise Resource Planning (ERP) System.

The NextGen project, which is leading the GA@WORK implementation, will benefit State of Georgia entities, employees, suppliers and contractors.

HOW WILL IT AFFECT ME?

The tasks you complete today in the TeamWorks / PeopleSoft system will be completed in the GA@WORK system in the future. Some of the benefits of the new, cloud-based system include:

Accessing the system from any device

Faster, user-friendly interfaces

Real-time data analytics reporting

Streamlined workflows

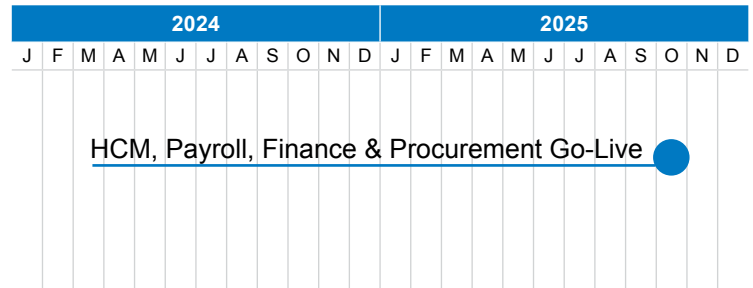

Paperless approvals

WHEN WILL IT GO LIVE?

The GA@WORK system is being deployed **October 1, 2025**. That go-live date will include components for Human Capital Management (HCM), Payroll, Finance and Procurement functions*.

* Please note: A previous version of this document reported two go-live dates for the various components of the system. The October 1, 2025, date is the revised go-live date for the full GA@WORK system.

WHAT DO I NEED TO KNOW?

The GA@WORK system is currently being configured to optimize the business needs of 200+ state entities. As we get closer to the go-live date, more information will be shared via your organization's Change Network members to help you prepare and train for the transition to the new system. Stay tuned!
