

Manufacturing/License Custodian – Physical Life Information Enhancement

The Physical Life Information enhancement has been added to the **Asset Management** function. This new feature allows users to track the physical life of an asset, determine the life expectancy of equipment and plan for equipment replacement.

Navigation: NavBar > Navigator > Asset Management > Asset Transaction > Owned Asset > Basic Add

The landing page opens on the **General Information** tab.

- Click on the **Manufacturing/License Custodian** tab.

The screenshot shows the 'Basic Add' form with the 'Manufacturing/License Custodian' tab selected. The form contains several sections:

- General Information:** Unit 41500, Asset ID 00000003072, CANON MS400 MICROFILM SCANNER, Tag GA0120590, In Service.
- Manufacturer Information:** Serial ID M38059, Manufacturer ID (searchable), Manufacturer Name CANON, Model MS400 (searchable), License Tag, Production Date, Federal Percent, Contact, VIN, and SKU.
- Physical Life Information (highlighted):** In Service Date 07/29/1999, Life Expectancy Yrs, End of Support, End of Life, Replacement, Life Expectancy % 0.00, Life Expectancy Note, End of Support Note, and End of Life Reason.
- License Information:** (expandable section)
- Custodian Information:** (expandable section)

At the bottom, there are buttons for 'Save', 'Return to Search', 'Add', 'Update/Display', 'Include History', and 'Correct History'.

The **Physical Life Information** section automatically open allowing the user to enter specific information to track the life expectancy of an asset.

- After entering the appropriate information, click the **[Save]** button.
