

TeamWorks Chief Financial Officers,

This email is in regards to [the attached communication from GTA](#), notifying you of the retirement of the Mobius/Luminist/ViewDirect applications. As a result of these changes, TeamWorks reports and data in the INFOSS-PROD and INFOSTT-TEST repositories will not be available beyond December 31, 2019.

SAO has been in communication with GTA and is aware of these changes. Additionally, SAO has developed a solution for providing TeamWorks reports and data currently obtained through Mobius View. Additional communications will be sent as this new solution is finalized and implemented. We do not intend for any agencies to lose access to reports relied upon. Our planned solution will simply provide those reports directly within TeamWorks. More information is forthcoming.

Please remember, as stated in [the email from GTA](#), *you will need to download any reports and data (if a policy is utilized) you would like to keep.* The reports and data will cease to be available past December 31, 2019 for the repositories INFOSS-PROD and INFOSTT-TEST.

Please share this information with your employees who use Mobius/Luminist/ViewDirect.

Regards,

Alan Skelton

State Accounting Officer
