

GA@WORK

Timekeeper Learning Programs

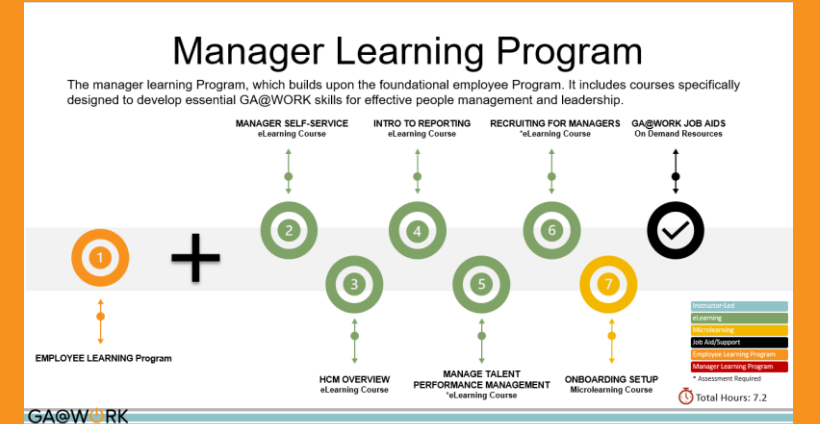

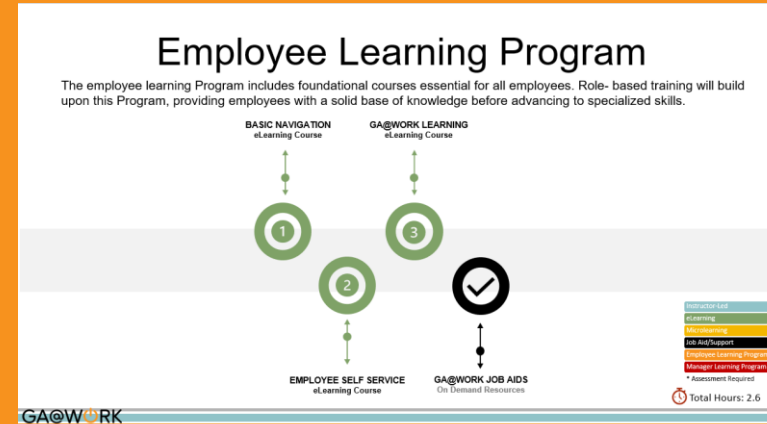

Role-Based Implementation Training
for Human Capital Management

Learning Programs

Each employee will have a Learning Program they will need to complete prior to using GA@WORK. The Learning Programs below include the Foundational Programs for employees and managers as well as example Role-Based Programs.

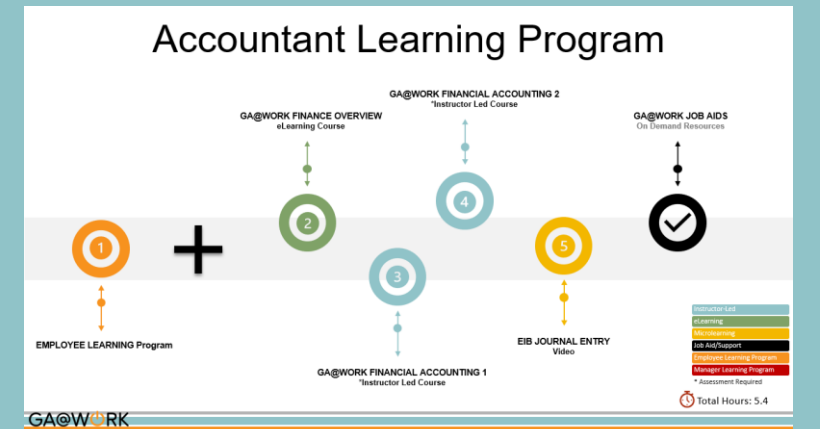

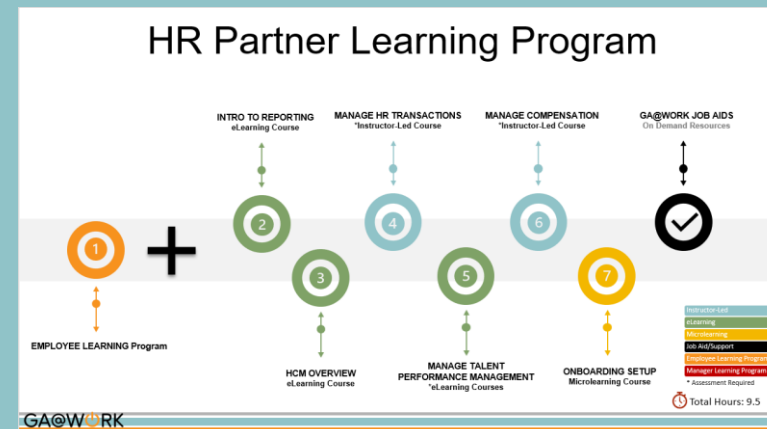

Foundational Learning Programs

The Employee and Manager Learning Programs provide the foundation for role-based training.

Role-Based Learning Programs

Role-based Learning Programs are comprehensive programs that build upon Foundational Programs and focus on role specific competencies.

Employee Learning Program

The employee Learning Program includes foundational courses essential for all employees. Role- based training will build upon this Program, providing employees with a solid base of knowledge before advancing to specialized skills.

Assumptions

- Learning Programs are role based, and employees with multiple roles accumulate total learning hours from each role's requirements. (i.e., in smaller agencies, personnel with multiple job responsibilities will have more training hours).
- The total training hours are the sum of hours required for each role, with eLearning courses having estimated hours as they are self-paced.
- Employees' progress along their learning Programs is assessed through knowledge checks, hands-on practice, and end of course assessments where applicable.
- eLearning, microlearning and job aids are all on-demand resources and accessible to end users as needed through GA@WORK or Intellum LMS.
- Learning Program completion for high-impact roles is mandatory, and participants must pass associated assessments with a minimum score of 80%.
- If users do not attend the required training or fail to pass the necessary assessments, both managers and users will be notified of the next steps, and system access will be withheld until all mandatory courses and assessments are successfully completed.
- Courses do not need to be taken in the order presented unless a prerequisite is required, in which case the specified order must be followed.
