## Section II:  Data Dictionary

**Report Name**                                                                                                                    **Page**

*(Queries)*

| QUERY NAME | PURPOSE | COMMENTS | DATA RETURNED BY QUERY |
|---|---|---|---|
| | | | |
| 0DD001_DataDictnry_Field_List | Provides a listing of PeopleSoft records and fields available for query purposes as well as the field definitions. | This listing only includes fields found on records which are part of the tree QUERY_TREE_HRMS. | Record Name, Field Number, Field Name, Field Type, Length, Decimal Positions, Short Name, Long Name, Translates Exist |
| | | | |
| 0DD002_DataDictnry_Panel_XREF | Provides a cross reference listing of the panels and panel fields to the records and the record fields.  In other words, it maps the data in the records to the data on the panels.  It is intended to assist with communications between technical staff writing queries who know the record and field names and the functional staff who know the panels and the fields on the panel. | This listing only includes record and field information for records that are on the tree QUERY_TREE_HRMS and panel information for panels with a language code of ENG and a market of GBL or USA. | Actual Panel Name, Panel Name on Menu in PS (PeopleSoft), Field Name on Panel, Record Name, and Field Name in Record |
| | | | |
| 0DD003_DataDictnry_Record_List | Provides a listing of all record names available for query purposes. | This listing only includes records found on the tree QUERY_TREE_HRMS. Records with names beginning with DX are custom records created by the Phoenix Team. | Record Name |
| | | | |
| 0DD004_DataDictnry_Translates | Provides a listing of all Peoplesoft fields that have translate values defined and the short and long descriptive names of each translate value. | Fields are only from tables that are found on the tree QUERY_TREE_HRMS.  Language code must be ENG. | Field Name, Field Value, Short Translate Name, Long Translate Name. |
