Visual Basic Error Message

When you open the template the Security Warning Option will be displayed. Be sure to select "Enable the Content"

When the "Compile error: Can't find project or library" (or "Compile Error - Sub or Function not defined") Visual Basic error comes up:

SIRNLMCRO.xlam - mImportControl (Code)			
(General)	JrnlSheet_New		
	End If		
End	If		
End Fund	tion

Click "OK" to this message.

Microsoft Visual Basic for Applications			
This command will stop the debugger.			
ОК	Cancel	Help	

Click "OK" to this message.

Hold down ALT+F11, (or click on the orange icon under "Tools" dropdown and then click on "Tools > References").

- 2) Your "Available References:" popup should look like this.
- 3) Uncheck the older macro file with "MISSING" next to it.

- Then click on "Browse" and navigate to where the directory is that has your current macro file in it. Select file and click OK.
- 5) That should bring the new macro file into the above list. Be sure the "Jrbdmcro" file is checked on.

- 6) Then OK and SAVE your way out of everything.
- 7) Come back in and try to access template again. It should work this time.
